Fully integrated with Act!

Works with Act! Pro and Premium versions 16-19

Annual user licences -

The number of Seamless Opportunities licences you will need depends on how many people need to have access to the software. So, for example, you may have 6 people in your team using Act! but only need to purchase 3 licences for those users who will do quotes.

Automatic quote number generation

Calculated fields-

Perform calculations using numeric fields between contact, company and opportunity fields to merge to your quote.

Quotation template gallery

Quotation template design link to Microsoft® Word

Mail merge for Microsoft® Word and Adobe® PDF

Works with remote Act! databases -

Seamless Opportunities works with remote databases. You synchronise to your main Act! database using the Seamless Opportunities syncing tool.

Free technical support -

Every order for Seamless Opportunities (no matter how many licences that includes) comes with free technical support. Support is provided over the telephone and by e-mail but is restricted to technical functional issues, not set up or template creation. You can get help with these things by purchasing a Jump Start or Design Kit in Seamless Opportunities Extras.

Product/service image referencing

Easy import of both Act! products and external product files

Multi-currency quoting -

You maintain the exchange rate for any currencies you wish to use. Once you have created a foreign exchange quote it is set for that quote until you amend it, not when you change the rate table.

Multiple price lists-

Hold multiple price lists and select which one you wish to use within the quote.

Quantity discounting-

Set and use quantity discounts by customer e.g. buy 1-5 at £5, 6-10 at £4.50 etc.
